**TOTAL FIBER OPTICS (OSP) INSTALLATION  
SOLUTIONS AND MACHINERIES**

# GOWIN MICRO DIT APPARATUS

# GOWIN MICRO DIT APPARATUS

## MICRO DIT TEST APPRATUS

Following Tests can be done using the device.

1. **Duct Crushing Test**
2. **End to End Connectivity Proving**
3. **Steel Balls Passing Test to justify ducts are free to pass**
4. **Pressure Test to ensure the coupling joints intact and no damage to the underground laid micro ducts bunch**

# KEY FEATURES

1. The Micro DIT Apparatus is provided with connectors to connect Micro ducts of diameter from 7 mm to 20 mm.
2. A set of 7 Micro ducts can be connected at a time to carry out the DIT.
3. Pressure Gauges of 7 No's mounted on a single panel with back end connectors connected directly with micro ducts to detect pressure level to ensure there is no leakage.
4. A set of stainless steel socking will be provided to safely receive steel balls also to avoid ejecting steel balls directly into air.

**THANK YOU!**
